Average salary: \$4,500/month

All-technical team (100% engineers + designer)

AI INFRASTRUCTURE (30%) - \$90,000

PRIORITY #2: Powerful AI Capabilities

1. Cloud Computing & GPU: \$48,000

- NVIDIA A100 GPU (on-demand + reserved)
- AWS p3.8xlarge or GCP a2-highgpu-4g
- Usage:
 - Training emotion recognition (continuous improvement)
 - Model optimization (weekly iterations)
 - Batch processing for all users
 - Real-time inference optimization
- Cost: ~\$8,000/month × 6 months
- Strategy: Mix of on-demand and spot instances for cost optimization

2. AI API Services: \$24,000

- OpenAI GPT-4 Vision: \$12,000
 - Content analysis & classification
 - Smart montage suggestions
 - Scene understanding
 - 200K+ API calls/month
- Anthropic Claude 3: \$8,000
 - Creative writing assistance
 - Context understanding
 - Dialogue generation
 - 150K+ API calls/month
- Replicate / Hugging Face: \$4,000
 - Open-source models hosting
 - Custom model deployment
 - A/B testing different models

3. Audio/Video Processing: \$10,000

- Whisper API (transcription): \$6,000
 - High-quality speech-to-text
 - Multi-language support
 - Speaker diarization
- ElevenLabs (voice cloning): \$4,000
 - Voice synthesis for previews
 - Text-to-speech for tutorials
 - Custom voice training

4. Infrastructure & Data: \$8,000

- AWS S3 / CloudFront CDN: \$4,000
 - Asset storage (models, templates)
 - Global content delivery
 - Fast media processing
- Redis / Database: \$2,000
 - Caching layer
 - Session management
 - Analytics data
- Monitoring & Analytics: \$2,000
 - Sentry (error tracking)

- DataDog (performance monitoring)
- Custom ML metrics dashboard

Total AI Infrastructure: \$90,000 (30% of budget)

This budget allows us to:

- Train and deploy custom AI models
- Support 50K-100K users with AI features
- Experiment with new AI capabilities
- Maintain 99.9% uptime for AI services
- Scale infrastructure as users grow

MARKETING & GROWTH (22%) - \$66,000

PRIORITY #3: Lean, Organic Growth

1. Creator Partnerships: \$28,000

Strategy (Founder-led):

- 30-35 YouTube/TikTok creators (50K-500K followers)

AI Orchestrator - Technical Overview

What is AI Orchestrator?

AI Orchestrator - the central "nervous system" of Timeline Studio that coordinates all AI services and ensures their effective interaction.

The Problem

Traditional video editors:

- Adobe Premiere: AI features fragmented, no coordination
- DaVinci Resolve: AI only for color grading, no unified system
- Final Cut Pro: Limited AI, no orchestration
- CapCut: Cloud-only, slow, privacy concerns

Result:

- Slow processing (sequential tasks)
- High system load (no resource management)
- Poor UX (UI freezes during analysis)
- No prioritization (all tasks equal priority)

Our Solution: AI Orchestrator

Timeline Studio AI Orchestrator - world's first unified AI management system for video editors.

Key Capabilities:

- Unified analysis coordination (5 engines work together)
- Intelligent resource allocation (CPU/GPU/Memory)
- Priority-based processing (4 priority levels)
- Real-time health monitoring
- Graceful degradation
- Auto-scaling

Competitive Advantage: Timeline Studio is the only video editor with unified AI orchestration architecture.

Technical Architecture

- 99.9% uptime guarantee
- Cost-efficient scaling

3. Continuous Innovation

- Weekly model improvements
- A/B test new AI features
- Experiment with cutting-edge models
- Stay ahead of competitors

4. Enterprise-Ready

- On-premise deployment option
- API for custom integrations
- Advanced analytics
- White-label capabilities

Market Opportunity

Total Addressable Market (TAM)

\$78.4B **Total** Addressable Market (2025)

- └─ Video Editing Software: \$3.2B
