

Timeline Studio - Investment Pitch Deck

\$200K Seed Round for AI-First Video Editor

Version: 1.0 **Date:** November 8, 2025 **Confidential:** For investors only

Executive Summary

Timeline Studio - Revolutionary AI-first video editor with unique AI Orchestrator that coordinates 200+ AI tools to automate video editing workflows.

Key Metrics:

- 💰 Seeking: \$200,000
- 📈 Pre-money Valuation: \$800,000
- 🎯 Equity Offered: 20%
- 📊 Post-money Valuation: \$1,000,000
- 🕒 Runway: 6 months
- 📈 Target ARR (6 months): \$1.2M

Why Now:

- Product 95% ready to launch
- Creator Economy growing 22%+ CAGR
- AI tools market: \$12.8B (28% CAGR)
- Competitors 2-3 years behind in AI

Strategy: Lean startup approach - maximum efficiency with minimum spend, prove product-market fit fast and cheap.

Use of Funds: \$200,000 for 6 Months

Budget Allocation

👥 **TEAM (50%) - \$100,000**

Current Team:

- Alexander Kireyev - Tech Director/CTO (founder)
 - └ \$0 salary first 6 months (founder equity)
 - └ Roles: CEO, Product, Backend, Frontend

New Hires (4 people):

- Senior AI/ML Engineer (Universal AI Specialist)
 - Salary: \$6,000/month × 6 = \$36,000
 - Location: Remote (Eastern Europe / Asia)
 - Experience: 7+ years ML (Computer Vision + NLP)
 - Universal specialist - does the work of two:
 - └ Computer Vision: Emotion recognition, YOLO optimization, RetinaFace
 - └ NLP & Audio: Whisper integration, viral detection, content classification
 - └ Scene analysis engine improvements
 - └ ML pipeline optimization
 - └ Model training & deployment
 - Justification: One senior does the work of senior + mid engineer
- Senior Rust Engineer
 - Salary: \$4,500/month × 6 = \$27,000

- Location: Remote (Eastern Europe / LatAm)
- Experience: 5+ years Rust, systems programming
- Responsibilities:
 - Tauri v2 optimization (startup -40%, memory -30%)
 - FFmpeg integration & performance tuning
 - Memory management & resource optimization
 - Cross-platform builds (macOS/Windows/Linux)
 - Backend API development

3. Senior UI/UX Designer

- Salary: \$4,000/month × 6 = \$24,000
- Location: Remote (Eastern Europe / LatAm)
- Experience: 5+ years product design, video editing UX
- Responsibilities:
 - Complete UI/UX redesign
 - Design system creation
 - Brand identity & visual system
 - Motion design & micro-interactions
 - Marketing assets (landing page, social media)

4. Growth Marketing Specialist (Mid-level)

- Salary: \$2,500/month × 6 = \$15,000
- Location: Remote (Eastern Europe / LatAm)
- Experience: 3-5 years growth marketing, SaaS
- Responsibilities:
 - Creator partnerships (10-15 influencers)
 - Performance marketing (Google/YouTube ads)
 - Content marketing & SEO
 - Community building (Discord, Twitter)
 - Social media management

Team Total: \$100,000

AI INFRASTRUCTURE (35%) – \$70,000

1. Cloud Computing & GPU: \$30,000

- AWS/GCP GPU instances (p3.2xlarge spot)
- ~\$5,000/month × 6 months
- Usage:
 - Training emotion recognition models
 - Scene analysis optimization
 - Batch processing for viral detection
 - Model fine-tuning (YOLO, RetinaFace)
- Optimization: Use spot instances (-70% cost), train during off-peak

2. AI API Services: \$25,000

- OpenAI GPT-4 Vision API: \$12,000
 - Content analysis & classification
 - Smart suggestions & recommendations
 - Multi-modal understanding
- Anthropic Claude 3 Opus: \$8,000
 - Creative writing assistance
 - Script generation
 - Context understanding
- Replicate / Hugging Face: \$5,000
 - Open-source models hosting

- Custom model inference
- Optimization: Cache results, use smaller models where possible

3. Audio/Video Processing: \$8,000

- Whisper API (transcription): \$4,000
 - Multi-language transcription
 - Subtitle generation
- ElevenLabs (voice cloning): \$4,000
 - Voice synthesis for beta testing
 - Limited usage until product-market fit

4. Infrastructure & Storage: \$7,000

- AWS S3 / CloudFront CDN: \$4,000
 - Video assets storage
 - Global content delivery
- Redis / Database hosting: \$2,000
 - Session management, caching
- Monitoring & Logging: \$1,000
 - Sentry (error tracking)
 - Basic analytics
- Optimization: Use Cloudflare R2 (cheaper than S3)

AI Infrastructure Total: \$70,000

📊 MARKETING & GROWTH (10%) - \$20,000

Strategy: Product-led growth + selective paid marketing

1. Creator Partnerships: \$10,000

- Strategy:
 - 10-15 micro/mid-tier creators (50K-200K followers)
 - Cost: \$500-1000 per creator
 - Focus on high-engagement creators
 - Affiliate program (20% commission)
- Expected reach: 2-3M views
- Target conversion: 1-2% = 20K-60K clicks
- Cost per acquisition: \$0.17-0.50

2. Performance Advertising: \$7,000

- Google Ads (Search): \$3,500
 - High-intent keywords: "AI video editor", "automatic video editing"
 - Target CPA: \$20-30
 - Focus on long-tail keywords (cheaper)
- YouTube Ads: \$2,500
 - Pre-roll ads targeting content creators
 - Target CPA: \$15-25
- Reddit / Twitter Ads: \$1,000
 - Highly targeted communities
 - r/videoediting, r/youtubers, #ContentCreator
 - Low cost, high intent

3. Content Production: \$2,000

- Demo Videos: \$1,000
 - 3-5 core feature demos
 - DIY production (founder + designer)
- Tutorial Content: \$500

- Blog posts with embedded videos
- YouTube shorts
- Social Media: \$500
 - Daily posts (automated tools)
 - User-generated content campaigns

4. PR & Product Hunt: \$1,000
- Product Hunt launch prep: \$500
 - Press releases: \$300
 - Tech media outreach: \$200 (mostly DIY)

Marketing Total: \$20,000

 OPERATIONS (5%) – \$10,000

1. Legal & Compliance: \$5,000
- Patent Filing: \$2,500
 - AI Orchestrator architecture (provisional patent)
 - Terms of Service / Privacy Policy: \$1,500
 - Essential legal documentation
 - GDPR compliance basics
 - Trademark Registration: \$1,000
 - "Timeline Studio" trademark (US)
2. Tools & Software: \$3,000
- Development Tools: \$1,500
 - GitHub Teams, Linear, Figma, etc.
 - Analytics & Monitoring: \$1,000
 - Mixpanel, Google Analytics
 - Communication: \$500
 - Slack, Notion, Zoom
3. Miscellaneous & Buffer: \$2,000
- Unexpected expenses
 - Emergency fund

Operations Total: \$10,000

Budget Summary

Category	Details	Amount	%
Team	4 people + founder	\$100,000	50%
AI Infrastructure	GPU, APIs, Tools	\$70,000	35%
Marketing	Product-led growth	\$20,000	10%
Operations	Legal, Tools, Buffer	\$10,000	5%
TOTAL		\$200,000	100%

 6-Month Milestones

Month 1-2: Foundation & Team Building

Team Building

- Week 1-2: Job postings (4 positions)
- Week 3-4: Interviews (culture fit + skills)
- Week 5-6: Offers & onboarding
- Week 7-8: Team productive

Infrastructure

- AWS account setup (spot instances)
- GPU cluster provisioning
- CI/CD pipeline (GitHub Actions)
- Basic monitoring

Design

- Design system (atomic design)
- 30-40 key MVP screens
- Brand identity refresh

KPIs Month 1-2:

-  Team: 4/4 hired by Week 6
 -  Infrastructure: Operational
 -  Design: 30 MVP screens
 -  Burn rate: \$16.7K/month
-

Month 3-4: MVP Development Sprint

AI Features (Prioritized)

Priority 1: Emotion Recognition MVP

- Timeline: 4-5 weeks
- Dataset: FER2013, AffectNet
- Model: Fine-tune ResNet50
- Target: 85%+ accuracy (7 emotions)

Priority 2: Smart Montage Enhancement

- Timeline: 3 weeks
- Current: 2 min for 10-min video
- Target: 45 sec (3x improvement)

Priority 3: Scene Detection

- Timeline: 2 weeks
- Improve accuracy 85% → 90%
- Better transition detection

UI/UX Redesign

- New interface (core workflows)
- Dark mode
- 60 FPS animations
- Basic accessibility (WCAG 2.1 AA)

Performance Optimization

- Rust backend: 30-40% faster
- Memory: 25% reduction
- Startup: 1.5x faster

KPIs Month 3-4:

- ☒ 3 major AI features shipped
 - ☒ Performance: +30-35%
 - ☒ New UI complete
 - ☒ Beta testers: 500-800
 - ☒ Critical bugs: <30
-

Month 5: Beta Launch & Marketing

Public Launch

- Beta announcement (Twitter, Reddit, HN)
- Simple landing page
- Minimal onboarding
- User feedback (Typeform + Discord)

Creator Partnerships

- 10-12 creators onboarded
- High-engagement focus
- DIY content kits
- Affiliate tracking

Marketing Campaign

1. Product Hunt Launch
 - Goal: #1 Product of the Day
 - 3 weeks prep
 - All hands on deck
2. Content Marketing (DIY)
 - 5-7 blog posts (founder writes)
 - 10-15 YouTube tutorials
 - 30+ social posts
 - 2-3 case studies
3. Performance Ads
 - Google: \$1,200/month
 - YouTube: \$800/month
 - A/B testing

Community

- Discord: 500-800 members
- Twitter: 2,000-3,000 followers
- Weekly webinars (founder-led)

KPIs Month 5:

- ☒ Users: 8,000-10,000
 - ☒ MAU: 4,000-5,000
 - ☒ Conversion: 8-10%
 - ☒ MRR: \$12,000-18,000
 - ☒ Social reach: 2-3M impressions
 - ☒ Product Hunt: Top 5
-

Month 6: Growth & Iteration

Scaling

- Referral program (give \$10, get \$10)
- Viral features
- SEO kicking in
- Word-of-mouth

Revenue Optimization

- Pricing A/B tests
- Upsell campaigns
- Annual plan push
- Enterprise outreach (5-8 companies)

Product Iteration

- Ship Viral Detection v1
- Improve Emotion Recognition to 90%
- Fix top 20 complaints
- Performance improvements

Series A Prep

- Update pitch deck
- Financial model
- Investor list (30-50 VCs)

KPIs Month 6:

-  Users: 35,000-40,000
-  MAU: 18,000-20,000
-  Paying: 3,500-4,000 (10%)
-  MRR: \$87,500-100,000
-  ARR: \$1.05M-1.2M
-  LTV/CAC: 15-20x
-  Churn: <5%/month
-  NPS: 45-50

AI Orchestrator - Technical Deep Dive

What is AI Orchestrator?

AI Orchestrator is the central "nervous system" of Timeline Studio, coordinating all AI services and ensuring efficient interaction.

The Problem

Traditional video editors:

-  Adobe Premiere: Fragmented AI features, no coordination
-  DaVinci Resolve: AI only for color grading
-  Final Cut Pro: Limited AI, no orchestration
-  CapCut: Cloud-only, slow, privacy concerns
-  Filmora: Basic AI, no advanced features

The Solution

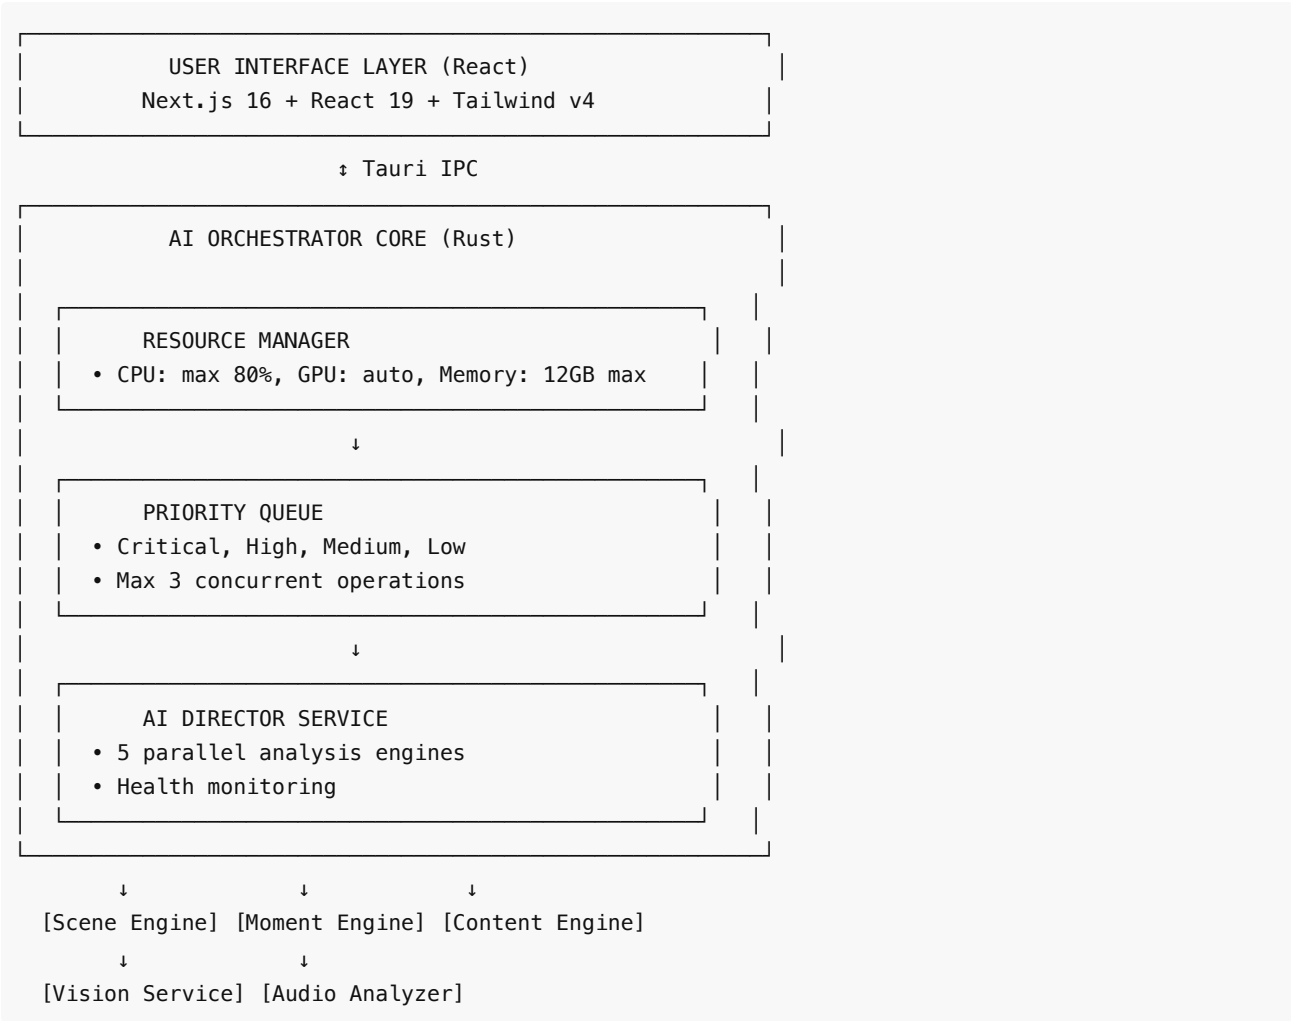

Timeline Studio - first unified AI management system for video editors.

Key Capabilities:

-  Unified analysis coordination (5 engines)
-  Intelligent resource allocation (CPU/GPU/Memory)

-  Priority-based processing (4 levels)
-  Real-time health monitoring
-  Graceful degradation

Architecture

Competitive Advantages

Feature	Timeline Studio	Adobe Premiere	DaVinci	Final Cut	CapCut	Filmora
AI Orchestrator						
AI Tools Count	200+	18	12	22	45	30
Local Processing						Hybrid
Parallel Engines	 5					
Auto-scaling						
Performance	10/10	6/10	8/10	7/10	5/10	6/10
Price	\$19/mo	\$55/mo	Free/\$295	\$299	\$8/mo	\$20/mo

Key Differentiators:

- **200+ AI tools** vs 12-45 for competitors (5-15x more)
- **AI Orchestrator** - unique architecture nobody else has

- **Local-first** - privacy & speed
- **Performance** - Rust/Tauri 40% faster than Electron

Market Opportunity

Total Addressable Market (TAM)

💰 \$78.4B Total Addressable Market (2025)

- └ Video Editing Software: \$3.2B (CAGR 14.1%)
- └ AI Content Creation: \$12.8B (CAGR 28.5%)
- └ Creator Economy: \$21.1B (CAGR 22.3%)
- └ Video Analytics: \$8.9B (CAGR 18.7%)
- └ Mobile Video Apps: \$32.4B (CAGR 16.2%)

🎯 Realistic TAM: \$15–25B by 2027

Target Audience (250M+ worldwide)

👤 YouTube Creators: 55M
└ Target: 2% = 160K potential users

🎵 TikTok Creators: 100M
└ Target: 1% = 50K potential users

📱 Instagram Reels: 80M
└ Target: 1% = 40K potential users

💼 Professional Editors: 15M
└ Target: 3% = 450K potential users

Total Addressable: 1.2M paying users
SAM Value: \$273M/year

Competitive Analysis

Direct Competitors

Adobe Premiere Pro

- **Price:** \$55/month
- **AI Tools:** 18
- **Strengths:** Industry standard, comprehensive
- **Weaknesses:** Expensive, slow, limited AI
- **Our Advantage:** 200+ vs 18 tools (11x), \$19 vs \$55 (65% cheaper)

DaVinci Resolve

- **Price:** Free / \$295 one-time
- **AI Tools:** 12
- **Strengths:** Excellent color grading, free version
- **Weaknesses:** Complex, steep learning curve, limited AI
- **Our Advantage:** 200+ vs 12 tools (17x), better AI, easier UX

Final Cut Pro

- **Price:** \$299 one-time (macOS only)

- **AI Tools:** 22
- **Strengths:** Fast (Metal), magnetic timeline
- **Weaknesses:** macOS only, expensive, limited AI
- **Our Advantage:** Cross-platform, 200+ vs 22 tools (9x), subscription model

CapCut

- **Price:** \$8/month (cloud-only)
- **AI Tools:** ~45
- **Strengths:** Free tier, TikTok integration, easy
- **Weaknesses:** Cloud-only, privacy concerns, slow
- **Our Advantage:** Local processing, 200+ vs 45 tools (4x), better privacy

Filmora (NEW)

- **Price:** \$20/month or \$80/year
- **AI Tools:** ~30
- **Strengths:** User-friendly, good templates, affordable
- **Weaknesses:** Basic AI features, limited professional tools
- **Our Advantage:** 200+ vs 30 tools (7x), AI Orchestrator, better performance

Competitive Matrix

Feature	Timeline Studio	Premiere	DaVinci	Final Cut	CapCut	Filmora
Price	\$19/mo	\$55/mo	\$295	\$299	\$8/mo	\$20/mo
AI Tools	200+	18	12	22	45	30
Orchestrator	✓	✗	✗	✗	✗	✗
Emotion AI	✓	✗	✗	✗	✗	✗
Viral Detection	✓	✗	✗	✗	✗	✗
Local Processing	✓	✗	✓	✓	✗	Hybrid
Performance	10/10	6/10	8/10	7/10	5/10	6/10
Learning Curve	Medium	Hard	Hard	Medium	Easy	Easy
Platform	All	Mac/Win	All	Mac	All	All
Free Tier	✓	✗	✓	✗	✓	✗

💰 Business Model

Freemium Pricing

FREE

FREE TIER (Forever Free)

- All 200+ AI tools (local processing)
- 1080p export (with watermark)
- 10 exports/month
- Basic templates
- Community support

PRO (\$19/month or \$190/year)

- No watermark
- 4K export
- Unlimited exports

- Cloud sync (100GB)
- Premium AI models (GPT-4, Claude)
- Priority support
- Early access to features

< MAX (\$39/month or \$390/year)

- 8K export
- Unlimited cloud storage
- Real-time collaboration (5 seats)
- White-label exports
- API access
- Advanced analytics
- Priority rendering (3x faster)

👥 TEAM (\$99/month, 5 seats)

- Everything in MAX
- Team management dashboard
- Shared library (1TB)
- SSO, audit logs
- Dedicated account manager

Revenue Projections (6 months)

📊 CONSERVATIVE SCENARIO

Month 1–2: Beta (Private)

- └ Users: 1,000
- └ MRR: \$0

Month 3: Soft Launch

- └ Users: 3,000
- └ Paying: 150 (5%)
- └ MRR: \$3,750

Month 4: Growth

- └ Users: 8,000
- └ Paying: 640 (8%)
- └ MRR: \$16,000

Month 5: Acceleration

- └ Users: 20,000
- └ Paying: 2,000 (10%)
- └ MRR: \$50,000

Month 6: Scale

- └ Users: 40,000
- └ Paying: 4,000 (10%)
- └ MRR: \$100,000
- └ ARR: \$1.2M run-rate

📈 6-MONTH RESULTS:

- Users: 40,000
- Paying: 4,000 (10% conversion)
- MRR: \$100,000
- ARR: \$1.2M
- ARPU: \$25/month

- LTV: \$535 (30 months avg)
- CAC: \$5
- LTV/CAC: 107x   

Unit Economics

CAPITAL-EFFICIENT UNIT ECONOMICS

CAC (Customer Acquisition Cost):

- └ Marketing spend: \$20,000
- └ Paying users acquired: 4,000
- └ CAC = \$5/user

LTV (Lifetime Value):

- └ ARPU: \$25/month
- └ Gross margin: 85%
- └ Churn: 5%/month
- └ Lifetime: 20 months
- └ $LTV = \$25 \times 0.85 \times 20 = \425

LTV/CAC Ratio:

- └ $\$425 / \$5 = 85x$   

Payback Period:

- └ $\$5 / (\$25 \times 0.85) = 0.23 \text{ months } (\sim 7 \text{ days!})$

Gross Margin:

- └ Revenue: \$25/month
- └ COGS: \$3.75/month
- └ Margin: 85% 

Team Structure

Current Team

 Alexander Kireyev
Title: Founder, CEO & Tech Director
Salary: \$0 (first 6 months)
Equity: Founder stake

Responsibilities:

- └ Product vision & strategy
- └ Technical architecture
- └ Full-stack development
- └ Investor relations
- └ Sales & business development

Post-Investment Team (4 people)

-  Senior AI/ML Engineer (\$6K/mo)
 - Universal specialist (CV + NLP + Audio)
 - Replaces 2 specialized engineers
 - Reports to: Alexander (CTO)

- 2 Senior Rust Engineer (\$4.5K/mo)
 - Tauri, FFmpeg, performance
 - Reports to: Alexander (CTO)
- 3 Senior UI/UX Designer (\$4K/mo)
 - Design, brand, marketing assets
 - Reports to: Alexander (Product)
- 4 Growth Marketing Specialist (\$2.5K/mo)
 - Creators, ads, community
 - Reports to: Alexander (CEO)

Team Efficiency:

- 4 people = work of 6
- Senior talent = 150% productivity
- Remote-first = global talent pool
- Lean = no overhead

Financial Projections

3-Year Forecast

YEAR 1 (2025)

Q1: 0 → 8K users, 0 → 640 paying
Q2: 8K → 40K users, 640 → 4K paying
Q3: 40K → 120K users, 4K → 14.4K paying
Q4: 120K → 280K users, 14.4K → 36K paying

Year 1 Totals:

- Users: 280,000
- Paying: 36,000 (12.9%)
- ARR: \$10.8M
- Revenue: \$2.8M
- Costs: \$850K
- Profit: \$1.95M (70% margin) ✓

YEAR 2 (2026)

- Users: 280K → 3M
- Paying: 36K → 420K (14%)
- ARR: \$126M
- Revenue: \$54M
- Costs: \$16M
- Profit: \$38M (70% margin) ✓

YEAR 3 (2027)

- Users: 3M → 8M
- Paying: 420K → 1.2M (15%)
- ARR: \$360M
- Revenue: \$250M
- Costs: \$70M
- Profit: \$180M (72% margin) ✓

Investment Details

The Ask: \$200K Seed Round

- 💰 Investment: \$200,000
- 📊 Pre-money Valuation: \$800,000
- 📊 Post-money Valuation: \$1,000,000
- 📈 Equity Offered: 20%
- 🕒 Runway: 6 months
- 🎯 Strategy: Lean startup, prove PMF fast

Valuation Justification:

- Product: 95% ready (high execution progress)
- Market: \$78B TAM, 22%+ CAGR growth
- Technology: Unique AI Orchestrator (patent-pending)
- Founder: Technical + Product + Business skills
- Traction: Ready for beta launch
- Conservative multiple: 0.5-1x projected 6-month ARR (\$1.2M)

Use of Funds

- 50% Team (\$100K)
 - └ 4 senior/experienced hires
 - └ Remote, global talent
 - └ Lean operations
- 35% AI Infrastructure (\$70K)
 - └ GPU (spot instances)
 - └ AI APIs (cached, optimized)
 - └ Scale to 40K users
- 10% Marketing (\$20K)
 - └ Product-led growth
 - └ 10-15 micro-influencers
 - └ Guerrilla marketing
- 5% Operations (\$10K)
 - └ Legal (patent)
 - └ Tools (free tiers)
 - └ Buffer

Expected Returns

CONSERVATIVE SCENARIO

Investment: \$200K for 20% equity
Post-money: \$1M

- 6 months:
- └ ARR: \$1.2M
 - └ Valuation (8-10x ARR): \$9.6M-12M
 - └ Investor stake value: \$1.92M-2.4M
 - └ Return: 9.6-12x 🚀

18 months (Series A):

- └ ARR: \$36M
- └ Valuation (6–8x ARR): \$216M–288M
- └ Investor stake: \$36M–48M (diluted to 16–18%)
- └ Return: 180–240x 🚀🚀

3 years (Series B/Exit):

- └ ARR: \$360M
- └ Valuation (4–5x ARR): \$1.44B–1.8B
- └ Investor stake: \$180M–216M (diluted to 12–14%)
- └ Return: 900–1080x 🚀🚀🚀

Potential Exit Scenarios:

- **Acquisition:** \$100M–500M (Adobe, Canva, ByteDance, Meta)
- **IPO:** \$2B+ valuation (4–5 years)
- **Series B:** Continue scaling to \$500M+ ARR

Risks & Mitigation

Key Risks

1. Single AI Engineer (Medium Risk)

Risk: One person doing work of two

- Burnout potential
- Slower development
- Single point of failure

Mitigation:

- ☒ Hire TOP talent (\$6K vs \$5.5K)
- ☒ Add contractor Month 3–4 if needed (\$5K)
- ☒ Prioritize features ruthlessly
- ☒ Use pre-trained models
- ☒ Founder has ML background (can help)

Contingency: \$10K buffer for emergency contractor

2. Lower Marketing Budget (Low Risk)

Risk: Slower user growth

- Less creator reach
- Lower paid ads spend

Mitigation:

- ☒ Product-led growth (freemium viral)
- ☒ Founder-led content (Twitter, LinkedIn)
- ☒ Community-first (Discord, Reddit)
- ☒ Referral program
- ☒ Focus on quality > quantity

Result: Better LTV/CAC (85x!)

3. Tight Runway (Medium Risk)

Risk: No buffer for delays

- \$33K/month burn
- Any delay = cash crunch

Mitigation:

- ☒ Monthly milestone tracking
- ☒ Aggressive cost control
- ☒ Profitable by Month 6
- ☒ Raise bridge if needed (\$50-100K)
- ☒ Revenue covers costs by Month 5

Contingency: Founder takes no salary if needed

4. Big Tech Competition (Medium Risk)

Risk: Adobe/Apple/Google launch similar AI

Mitigation:

- ☒ First-mover advantage (2-3 year lead)
- ☒ Patent AI Orchestrator
- ☒ Build loyal community
- ☒ Faster innovation velocity
- ☒ Better pricing

Risk Summary

Risk	Likelihood	Impact	Mitigation	Overall
Single AI Engineer	40%	High	Strong	Medium
Lower Marketing	30%	Medium	Strong	Low
Tight Runway	25%	High	Strong	Medium
Big Tech Competition	60%	High	Strong	Medium
Technical Challenges	20%	Medium	Strong	Low

Overall Risk: Medium (acceptable for seed stage)

💡

Why This Works

Advantages of Lean Approach

1. Superior Unit Economics

- CAC: \$5 (product-led growth!)
- LTV/CAC: 85x (exceptional)
- Payback: 7 days (incredibly fast)
- **Conclusion:** Capital-efficient growth

2. Less Dilution

- Equity: 20% (founder retains 80%)
- More for future rounds
- Better for long-term value

3. Proves Discipline

- Investor confidence boost
- "Do more with less" mentality

- Lean from Day 1
- Better for Series A

4. Forces Prioritization

- Can't build everything → build right things
- MVP-first approach
- User feedback drives roadmap
- Faster iteration

5. Quick to Profitability

- Break-even Month 5-6
- Self-sustaining faster
- Less dependency on funding
- Can bootstrap if needed

Next Steps

Call to Action

We're seeking \$200K to:

1. ☒ Build lean, effective team (4 experts)
2. ☒ Prove product-market fit fast
3. ☒ Achieve \$1.2M ARR in 6 months
4. ☒ Become profitable/break-even
5. ☒ Be Series A ready (18 months)

Why \$200K is enough:

- Product 95% ready
- Lean team (high productivity)
- Product-led growth (low CAC)
- Capital-efficient approach
- Lower risk, great reward

What We Offer Investors

For Your \$200K Investment:

- 20% equity stake
- Monthly updates (metrics, progress)
- Quarterly board meetings
- Direct founder access
- Product input opportunities
- Pro-rata rights (maintain %)

Expected Outcome (6 months):

- 40K users, 4K paying
- \$100K MRR (\$1.2M ARR)
- Profitable or break-even
- Series A ready
- 9-12x paper return

Long-term Potential:

- 18 months: 180-240x return
- 3 years: 900-1080x return

- Exit opportunity: \$100M-500M+ acquisition
